PROFILE

Full Stack Developer trained at UTN, where I completed the Full Stack Web Development Diploma in 2026. I work with React and TypeScript on the client side, and Node.js, Express, MongoDB and MySQL on the server side. I have already delivered freelance work for a real client in production and built complete applications end to end, with authentication, layered architecture and public deployment. I care about clean, maintainable code and interfaces that feel intuitive without needing an explanation.

EXPERIENCE

Freelance Web Developer

2026 - PRESENT

Eugenia Quevedo — Official Store · eugeniaquevedo.com

- Development and customization of the singer's official online store on Tiendanube, with a custom theme built in Twig, HTML, CSS and JavaScript.
- Layout and user experience improvements on a live store with real traffic and active sales campaigns.
- Ongoing maintenance and iterative improvements coordinated directly with the client.

PROJECTS

01 FrameBox

React · Express · MongoDB · MySQL · JWT

Final Capstone Project — UTN

Personal film library: each user builds a collection, sorts it by status and genre, rates titles and marks favourites. React frontend and Express backend with layered architecture (routes → controllers → services → repositories), CRUD over related entities, bcrypt hashing, JWT with expiration and email verification through Nodemailer. Frontend and backend deployed separately.

02 Weather Dashboard

JavaScript · Canvas API · OpenWeather

weather-app-santiago.vercel.app

Real-time weather app with animated cinematic scenes drawn on canvas that change with the weather condition, an hourly forecast interpolated every 30 minutes and support for 30 languages.

03 Task Tracker

React · Drag & Drop API · LocalStorage

task-tracker-santiago.vercel.app

Task manager with full CRUD, native drag & drop reordering, priorities, inline editing with keyboard shortcuts, filters, a progress bar and complete persistence in localStorage.

TECH STACK

FRONTEND

HTML5 CSS3 React JavaScript ES6+ TypeScript Flexbox / Grid Responsive

BACKEND

Node.js Express REST APIs JWT bcrypt Nodemailer

DATA

MongoDB Mongoose MySQL

TOOLS

Git GitHub VS Code Vercel Render AWS Tiendanube

EDUCATION

Full Stack Web Development Diploma

JUL 2026

Universidad Tecnológica Nacional — FRBA · 186 h · Online

JavaScript, TypeScript, React, Node.js, Express, MySQL, MongoDB and Mongoose, JWT authentication, AWS and deployment on Render, Vercel and Heroku.

Introductory Web Programming Course — Front End Developer

MAR 2026

Universidad Tecnológica Nacional — FRBA · 93 h · Grade: Excellent

Semantic HTML5 and accessibility, advanced CSS3 with Flexbox, Grid and animations, JavaScript ES6+ with DOM, fetch and promises, and React with components, hooks and state management.

High School Diploma — Natural Sciences

2018 - 2023

E.E.S. N.º 2 «Gral. Juan Lavalle» · Buenos Aires

ADDITIONAL

Languages: Spanish (native) · English
